InCom® Corporation

Products that provide real time information on asset management and location using Radio Frequency Identification (RFID):

- **Accountability**
- **Accuracy**
- **Efficiency**
- **Security**

InCom[®] Corporation.

A company formed by professionals to develop RF products for *difficult* tracking situations.

OnSite[™] provides asset tracking in previously hard to read environments.

OnSite[™] is a total solution automatic identification and data capture system (AIDC), which comes with custom report generation.*

OnSite[™] provides yard or warehouse based business automated location and tracking system, which enhances asset utilization, security and profitability.

OnSite[™] accommodates businesses of any size or number of locations.

OnSite[™] grows and expands with your business, number of locations and equipment inventory.

OnSite[™] Hand-held unit is used to update equipment status in data base.

OnSite[™] will work seamlessly with most Windows[®] based information systems.

OnSite[™] is the perfect solution for tracking fixed assets deployed to a customer site, both long and short term.

OnSite[™] monitors entry and exit of equipment, provides real time information and can be accessed from one or more management location.

OnSite[™] generates tracking reports for any piece of equipment, customer and asset history for maintenance.

OnSite[™] uses a proprietary tag system, which works with metals, plastics and composites, giving your business flexibility, accuracy and vital information for asset management.
